Replacement of the adapter

**Step 1:** Remove the old adapter from the tube

**Step 2:** Use a new tube for replacement (included with delivery)
Connection of the new adapter to the tube

Step 3: Connect the new adapter to the tube

Make sure that the tube touches the adapter body completely!
Connection of the new adapter to the endoscope

**Step 1:** Lead the tube with the adapter to the endoscope

**Step 2:** Press the spring on the adapter
**Connection of the new adapter to the endoscope**

**Step 3:** Lead the tube with pressed spring to the endoscope.

**Step 4:** Let go of the spring. The adapter should snap into place noticeably.

**Step 5:** Make sure the adapter is secure.

⇒ After that, the cleaning process can be started.
